## Alarm Monitoring

As you may already be aware, in April this year we "Contracted" our monitoring services out to Country Wide Monitoring. This means they do the monitoring on our behalf. We still own and have complete control over the

monitoring service and can pull the plug should we feel the need to. So just to confirm the big question whether Computech has sold or not? The answer is **NO WE HAVE NOT SOLD!!!**

*A big "THANK YOU" to everyone who came to see us at the Whakatane Beacon Business & Leisure Show last month. It was a huge success & we hope to have another stand there next year. "Check out our "After Show Special" further down"*

We have implemented a new phone system. When contacting us you will now be prompted to select from the following options.

- Press 1 for Monitoring Services (Country Wide Monitoring)
- Press 2 for Louise (Accounts Receivable)
- Press 3 for Michelle (Accounts Payable)
- Press 4 for Wes (Patrols and Manpower Services)
- Press 5 for Wes (Technical Services)
- Press 0 for all other enquiries

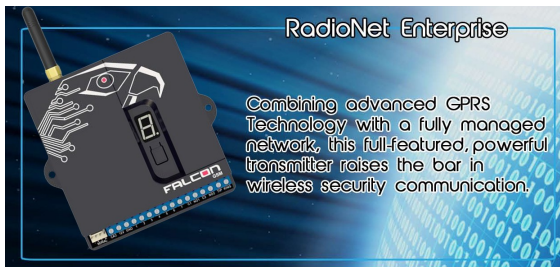

**Finance Available for all purchases over \$250.00 with 6 months interest FREE through GEM Finance.**

**Business finance available through Flexi Rent**

## **Have you switched to FIBRE?**

If you answered yes to the above question, then you will probably need a radionet unit. So give us a call in the office.

### **Advantages of Radio Monitoring**

- No need for a phone line to monitor your alarm.
- Very Secure. Unable to be interfered with by intruders.
- Alarm monitoring cannot be bypassed by cutting or damaging the phone line.
- Rapid notification of security alarm signals to your monitoring centre.
- No expensive phone call fee's or line charges.
- No interference with Broad-band internet and alarm monitoring.

Contrary to popular belief, your monitoring company will not receive any information from your security system in the event of your telephone lines (Landline) being cut or damaged, and we will not be aware of the interruption for up to 2 days. A Radionet transmitter alleviates this problem simply and economically.

**We operate a team of fully licensed, professional Security Guards, along with a fleet of Patrol Vehicles.**

**If you require mobile security or static guards then our patrolling service is for you.**

**Our patrolling service covers  
Kawerau, Edgumbe,  
Whakatane, Ohope,  
Awakeri, Taneatua and the  
surrounding areas.**

**We have static guards available  
for any situation, anywhere, at  
anytime in the Bay of Plenty area.**
